

Micro-Site Product Composition 4420

Product Description

Micro-Site is a parasiticide composed of medicinal herbs and ingredients that help the body remove circulatory parasites (micro and cellular sized) and their toxic by-products.

Directions

One or two capsules up to twice a day for 2-4 weeks, or as directed. Take as needed for maintenance. Increase the amounts of liquids you drink while taking this product.

Supplement Facts

Serving Size: 2 Capsules Ingredients	Amount Per Serving	%DV
Proprietary Blend	1020 mg	*
Barberry (Root Bark)		
Quassia (Inner Bark)		
Cat's Claw (Inner Bark)		
Pippali (Fruit)		
Lotus (Root)		
Magnolia (Bark)		
Senna (Leaves)		
Mulberry (Root Bark)		
Tansy (Flower)		
Papaya (Fruit)		
Thalamus FormCode™		
Pancreas FormCode™		
Liver FormCode™		

* Daily Value (DV) not established.

WARNING: KEEP OUT OF REACH OF CHILDREN.

Micro-Site should not be used while pregnant or nursing. Safe and proper use requires the skills of an experienced health practitioner.

60 Capsules

Para-Mac Product Composition 4431

Product Description

Para-Mac is an effectively blended parasiticide to help the body remove gastrointestinal parasites and their toxic by-products.

Directions

One or two capsules up to twice a day for 2-4 weeks, or as directed. Take as needed for maintenance. Increase the amounts of liquids you drink while taking this product.

Supplement Facts

Serving Size: 2 Capsules Ingredients	Amount Per Serving	%DV
Zinc	9.6 mg	70%
Proprietary Blend	1000 mg	*
Cayenne Pepper (Fruit)		
Garlic (Bulb)		
Dog Rose (Hips)		
Iceland Moss (Above Ground)		
Lotus (Root)		
Pau D'Arco (Inner Bark)		
Purslane (Leaves)		
Asafoetida (Resin)		
Hibiscus (Flower)		
Mugwort (Above Ground)		
Senna (Leaves)		
Thalamus FormCode™		
Bromelain		
Mexican Tea (Above Ground)		
Betel (Nut)		

* Daily Value (DV) not established.

WARNING: KEEP OUT OF REACH OF CHILDREN.

Para-Mac should not be used while pregnant or nursing. Safe and proper use requires the skills of an experienced health practitioner.

60 Capsules

The Parasite Paradigm

The real threat of parasites, are not usually recognized, however parasites have been the primary cause of the loss of millions of lives throughout the centuries especially when compounded with malnutrition. Based on the worldwide prevalence of selected parasites, Schmidt and Roberts¹ reported that more than 900 million human lives were lost due to hookworm alone. Parasitic infestations are inevitable even for the most advanced countries because parasites are highly contagious and transported with ease from place to place and from people to people.

It has been difficult for nutritional supplement companies to present a single anti-parasitic product that will eliminate the various parasite infestations because, for example, there are over 45,000 different species of protozoan alone with individual biological and morphological characteristics. Inno-Vita has been able to divide parasites into two distinct categories based on their shared morphologies. With this division, Inno-Vita has designed two naturally effective anti-parasitic formulas that will help the body exterminate these health-threatening parasites.

- **Micro-Site #4421 - Circulatory parasites**, otherwise known as microscopic protozoa, are single-celled organisms most commonly found in the United States. Unlike larger parasites, these reproduce rapidly in the intestines and are able to pass through cells allowing them travel to other organs throughout the body. They can be found in the liver, lungs, pancreas and heart. Examples of circulatory parasites include, Trematoda (Flukes), Trypanosomatida, Sporozoa, Protozoa.

- **Para-Mac #4431 - Gastrointestinal parasites** are classified as large and small parasites and are the consummate example of parasitism. Their bodies are reduced to mostly reproductive organs and are usually unintentionally consumed by the individual. These larger parasites will shed between 3,000 – 20,000 eggs per day. Some of the most common gastrointestinal parasites include, Cestoida (Tapeworms), Nematodes (Roundworms), Guardia, Amoebas, etc.

¹(Foundations of Parasitology, 4th Ed., Times Mirror/Mosby College Publishing, 1989)

"Parasites may rule the world... every living thing has at least one parasite that lives inside or on it, and many, including humans, have far more... We are a collection of cells that work together, kept harmonized by chemical signals. If an organism can control those signals – an organism like a parasite - then it can control us. And therein lies the peculiar and precise horror of parasites."

- Carl Zimmer. "Do Parasites Rule the World?"

What makes Macro-Site and Para-Mac Antiparasitic?

1. Unlike other anti-parasitic products, Micro-Site and Para-Mac are formulated to help the host prevent parasites from their own "Self-Fertilization" processes. Therefore, the formulas are very effective in treating fully-matured parasites as well as their eggs and larvae by prohibiting their own Glycolytic pathways.
2. Inno-Vita's anti-parasitic formulas are designed to help the body break off their faulty symbiotic relationship with parasites by disrupting the parasites' next ecological life-cycle.
3. Parasites adapt to their host's environment through their various life cycles in order to survive. These adaptive qualities are one of the reasons that parasites have successfully persisted throughout history. Once adapted to a generalized environment within their host, they are better capable of surviving anti-parasitic measures. To combat against the adaptive abilities of parasites Inno-Vita's anti parasitic formulas include ingredients designed to attack and disrupt this adaptation process.
4. These two Inno-Vita formulas contain an herbal blend that support the body's own ability to eliminate harmful microorganisms.
5. Inno-Vita's FormCodes™ within these formulas strengthen the effectiveness of their own unique healthy frequencies and signals to the various organs and their functions in order to expedite balance.

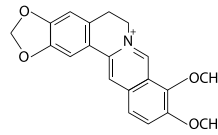

Micro-Site Key Ingredients

- **Barberry** has been used for anti-protozoan, anti-amoeba, and treatment for malaria infestations for centuries. Barberry contains a medicinal component called Berberine (*berbamine, oxyacanthine*) and chelidonic acid which are powerful anti-parasitic plant alkaloids which are very effective for ridding micro parasites found in various organs of the body.

Berberine Chemical Structure

- **Quassia** contains triterpenoid lactone, quassin has been used as an effective treatment for harmful microorganisms in Chinese Medicine for centuries.

- **Cat's Claw** has been added to the formula because of its natural immune stimulants, Oxindole alkaloids, triterpenes, and polyphenols to support the body's own elimination process.

- **Pippali** contains the active component piperine to inhibit the parasite's own self-fertilization process.

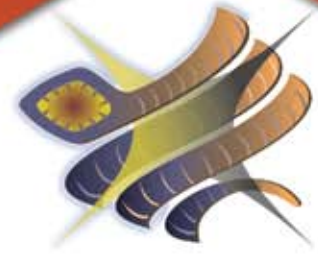

- **Thalamus, Pancreas and Liver FormCodes™** are added to support the key organs that play important roles in the body's own anti parasitic responses. These supported organs are especially important for combating circulatory parasites.

Liquid Compounds

Both Para-Mac & Micro-Site are also available as Liquid Compounds. Liquids are an excellent alternative for rapidly transporting these formulas unique properties throughout the body.

Please contact Inno-Vita if your test kit does not include samples of Micro-Site or Para-Mac so that these can be provided.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any diseases.

Para-Mac Key Ingredients

- **Cayenne Pepper** contains a medicinal component called Capsaicinoids which stimulates secretion of stomach acid (*Hydrochloric acid*) which is detrimental to the parasites in the digestive tract.

- **Garlic** Allicin found in garlic is well known for its anti-viral, anti-fungal, and anti-parasitic qualities. For centuries garlic and has been used for multiple purposes. It is added to the formula not only to increase the anti-parasitic properties but to also help enhance body's own immune and defense system.

- **Dog Rose** has been used for various protocols specifically for its ability to harm microorganisms because it contains higher amounts of key phyto nutrients, poly phenols, beta carotene, vitamin K, vitamin E, and vitamin C that are key for proper balance of nutrients when the body undergoes an anti-parasitic protocol.

- **Iceland Moss** contains usnic acid which is used for its strong properties. Studies show that lichenin contained in Iceland Moss is very effective in suppressing harmful microorganisms found in anaerobic environments.

- **Thalamus FormCode™** - The long-term presence of parasitic organisms can cause the body to mistake their existence as being symbiotic. The addition of the Thalamus FormCode™ is designed to help the body recognize the parasites negative impacts upon the body.

Dosages

Because amoebas and micro parasites do not have larval states there is no need to cycle the Micro-Site treatment, however the duration of use may depend on the degree or distance they have traveled from the digestive tract.

Para-Mac helps the body release parasitic organisms found in the digestive tract by inhibiting the parasites' self fertilization process, it is not required to take the formula in cycles unless directed otherwise by a health practitioner.
